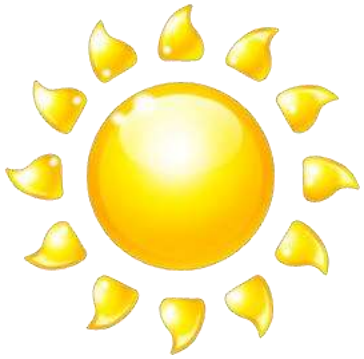
Shapes

You can find them everywhere

In Today’s Class we will Learn about Shapes!

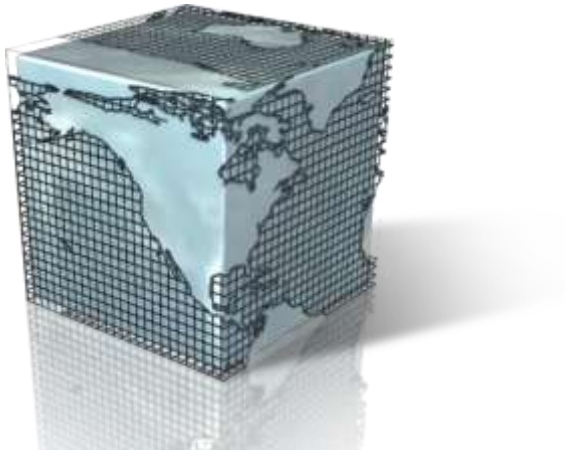
CIRCLE

- Hi, I'm a circle! I am round and have no sides!
- You can find me in many things like: dishes, clocks, coins, the moon when it is full, and in the Sun. I'm also the letter Oo.



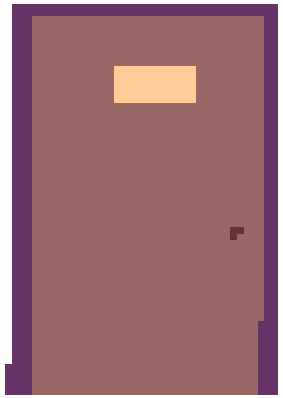
SQUARE

- Hi, I'm a square! I have four sides!
- You can find me in many different things like: a side of a box, a picture frame, piece of tile, and in your grandmothers quilt.



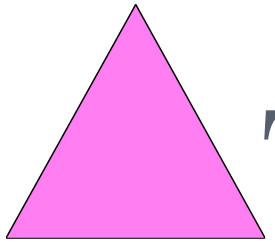
RECTANGLE

- Hi, I am a rectangle, I have 4 sides like a square.
- Two of my sides are longer than the other two sides.
- You can find me in many places like a door, area rug, ladders, fences, flags and an envelope.



Star

- Hi, I'm a star! I have 10 sides.
- You can find me in many places! There are 50 of me on the American Flag, billions of me in the night sky, I'm Patrick on SpongeBob Square pants, and



Triangle

- Hi, I'm a triangle, I have 3 sides!
- You can find me in many things like a slice of pizza, roof of a house, and in a protractor.

Oval

- Hi, I'm an oval! I have no sides nor no end!
- I am a long circle!
- You can find me in many places like: I am the shape of jelly beans, and eggs.

Heart

- Hi, I'm a heart! I'm a sign of love and I also live inside your body!
- You usually can see me around Valentine's Day!

HOMEWORK : Do Page no. 54 in book and draw and colour shapes in notebook also write their names.
